ČERNÉ JEZERO

Ve čtvrtohorách byly vrcholky některých šumavských hor pokryty menšími svahovými ledovci. Po ústupu doby ledové zůstaly po těchto ledovcích páneve zvané jezírky, které daly vzniknout všem šumavským jezírům. Keč Černé Jezero je zahlouben do svorového podlaží severovýchodní části Jezerní hory (1343 m.), nejvyššího vrcholu Železnobrodské hornatiny. Voda z jezera odtéká Černým potokem do řeky Úhlavy a do Severního moře.

Základní údaje:

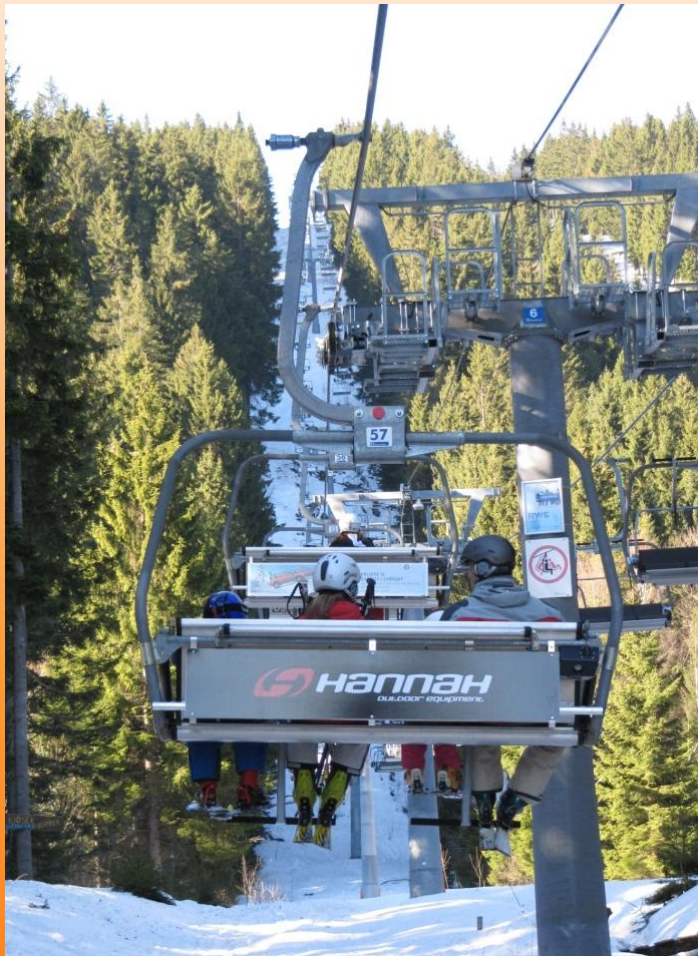

- největší šumavské jezero
- rozloha 18,4 ha
- obvod vodní hladiny 1 809 m
- maximální hloubka 39,8 m
- průměrná hloubka 15,6 m
- objem vody 2 873 000 m³
- oběrná oblast 1 286 km²

nejníže ležící z našich šumavských jezer

- nadmořská výška 1 008 m

součástí Národní přírodní rezervace Černé a Čertovo jezero o rozloze 175 ha

Winter in Šumava

Problems !

- **Bark beetle attack**
- **Wind Orcan Kyrill - January 2007 –
dammmaged 840 thousands m3 of wood**
- **2 solutions:**
 - **a) logging of attacked trees and forests**
 - **b) keeping trees without human touch**

**Our mountains attacked by the
Bark Beetle!!!**

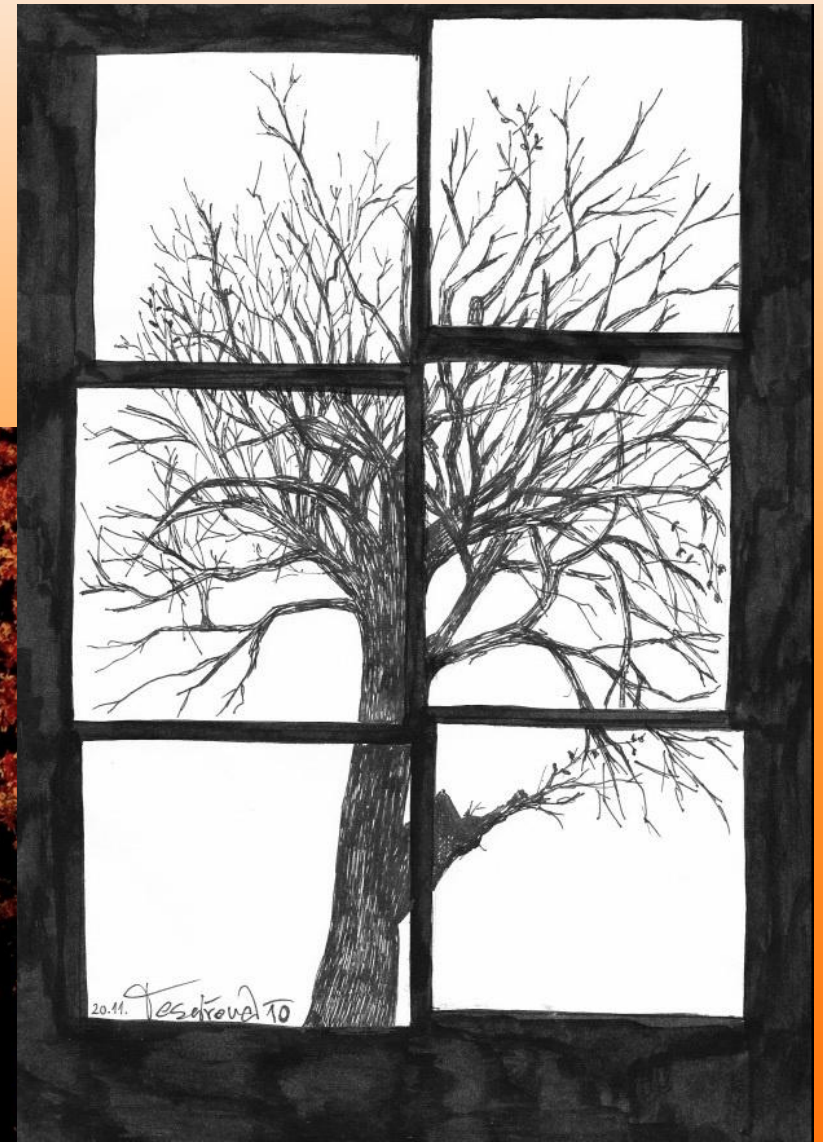

!!!

Trees, woods and memorable trees in Pilsen and surroundings

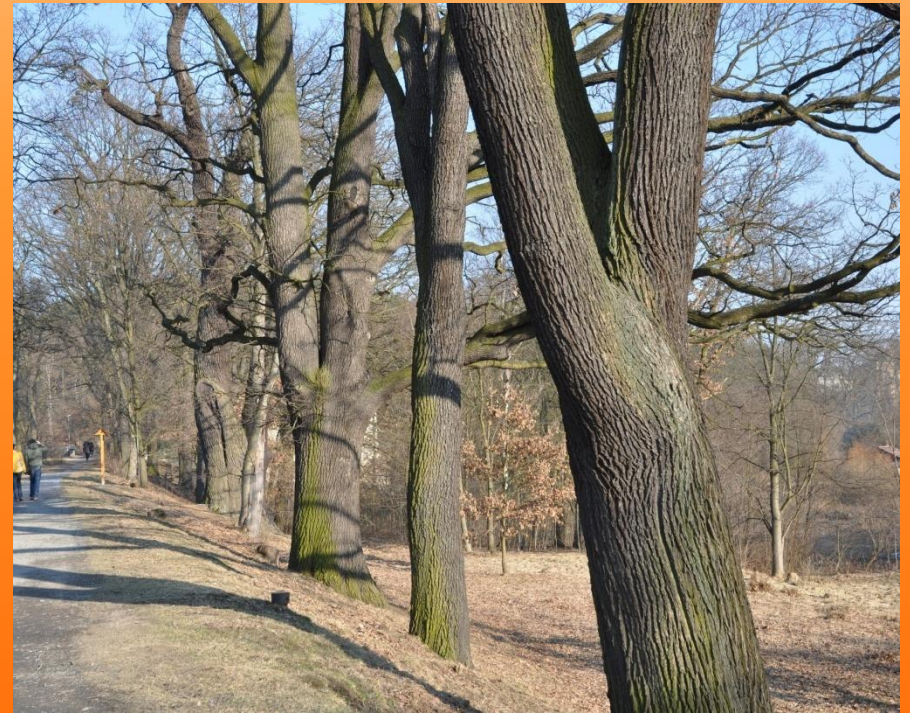

Memorable tree Summer Oak

Age 400 years

The Alley of memorable trees

Age 20 -200 years

Oak
Elm
Poplar
Lime
Ash
Maple
Hornbeam

Trees around our school

Trees around our school

We can study under "our trees"

Our Outdoor Classroom

Using in spring and autumn
For the art lessons
foreign languages
biology
geography...

For relaxation during breaks

**Big Opening
on 8th September 2010**

Outdoor Class

**Will our trees be called
"memorable" ones ???**
